Raffaele Belgiovine

Dear Logan,

Please accept this cover letter and resume as my application for the position of Architect/Interior Design. I strongly believe that my education, knowledge and enthusiasm make me an ideal fit. With a background in project management and a passion for design, I deliver a unique combination of artistic talent and technical expertise.

Communicator, Customer-Service Focused and Team Player are just a few key terms to describe me. My past and present experiences have developed these skills as well as proven them. I'm thrilled at the opportunity to bring more than 10 years of experience as an Architect at my self-owned company in Italy and had the opportunity to cooperate with high-end fashion Brands for some luxury malls in Rome .

I was brought up around construction/building sites as I come from a family of designers, constructors and builders. This tradition leading back two generations has proudly led me to love what I do.

This past year, I was responsible for preparing a full complement of construction documents for both commercial and residential projects. Each project gave me the opportunity to experience new layouts and engage with clients on a level that permitted me to design a tailored bespoke outlook. My strategy for each individual project (often times multitasking many on-going projects at one time), is to follow every aspect of the phase: clients desires and requests, concept, design, selection of materials and interior design/decor, execution and delivery.

In addition to my expertise in design, I'm also proficient with the major CAD software systems, including AutoCAD, 3dstudio max, Revit (from last year). In 2013, I spearheaded an initiative to use these systems to integrate 360-degree panoramic renderings into my clients presentations. These renderings have also resulted in improved client communication during project construction and have been praised by clients for providing "incomparable clarity and direction" during all stages of development.

I'm pleased to combine my Italian experience and design with your company in this marvelous city that has inspired me since my first visit years ago.

This cover letter resume highlight only a few of my skills. I hope to have one opportunity to show my qualities and to merge my artistic talents with my technical skills to create award-winning designs for your clients.

Thank you for your time and consideration.

Sincerely,

Raffaele Belgiovine
